**Object: Free of charge training on directors' duties with respect to climate change**

Dear Director,

You recently attended the 2021 Directors' Forum, *Climate Related Financial Risks & Opportunities for Credit Unions*, with the Ontario Co-operative Association. The plenary was an opportunity to explore how boards of directors can monitor and mitigate the risks of global warming while also providing authentic leadership to address climate change. We hope you enjoyed the session and found it informative.

Today, we are writing to you to offer our free of charge, private, and confidential board presentation to your directors. The Canada Climate Law Initiative (CCLI) works with [68 Climate Governance Experts](#) to offer climate governance training sharing insights on directors' duties, climate-related risks and opportunities, and climate disclosures. Kindly see below the Climate Governance Experts who participated in the event.

- [Christie Stephenson](#), Executive Director, Peter Dhillon Centre for Business Ethics
- [Carol Hansell](#), Senior Partner, Hansell LLP

Prior to the presentation, we can work with your governance team to tailor our materials to suit your needs. We keep the details of who attends our presentations strictly confidential, but if you wish, some firms choose to include reference to our climate governance training materials in their annual reports.

We'd be delighted to discuss and book a board presentation for your board directors at no cost. We look forward to hearing from you.

Sincerely,  
Juvarya Veltkamp

Director  
Canada Climate Law Initiative
